1 CCC PROGRAM HISTORY

There is no definitive date one can use to pinpoint when Optimist Clubs first became involved with childhood cancer projects within their own communities.

The first involvement of the governing board occurred in 1997, when members Jack Evans and Past-President Clifton Katz became acquainted with Dr. Desmond Hammond of the National Childhood Cancer Foundation (now known as the Foundation for the Children's Oncology Group) while working on the Optimist Rose Parade float.

Intrigued by the work of the Foundation and alarmed by the devastation caused by childhood cancer, Past-President Katz invited other leaders of Optimist International— including Past-Presidents J. Wayne Smith and André Dubois —to visit NCCF headquarters in Arcadia, California. After visiting the Foundation, the leadership supported Katz's contention that the cause of childhood cancer was a natural fit with Optimist International's mission.

Over the next several years, Club involvement with childhood cancer activities continued to grow. In appreciation of his efforts in this area, Dr. Hammond was presented with the Optimist International Humanitarian Award at the 1998 annual convention. By 1999, an ad-hoc Childhood Cancer Committee for the purpose of developing an Optimist International program for this cause was created, and ultimately developed the structure for the Childhood Cancer Campaign.

In December 2001, the Board of Directors of Optimist International passed a motion to make the CCC the organization's primary focus for the next five years. Simultaneously, the Optimist International Foundations pledged up to \$400,000 in operating funds for the same five-year period for the Childhood Cancer Campaign.

On March 24, 2004, Optimist International, led by International President Dwaine Sievers, signed an agreement with Johns Hopkins to create "The Optimist International Research Fellowship in Pediatric Hematology and Oncology." At that time, Optimist International made a commitment to raise \$920,000.00 over the next five years.

Members can be assured of the organization's commitment to CCC as evidenced by the unanimous support and endorsement of the program by the Board of Directors of Optimist International, its Foundations, and the executive staff for both entities.

2 GOALS OF THE CHILDHOOD CANCER CAMPAIGN

The program model is built to accentuate four areas of service on which Clubs can focus:

- Support to children diagnosed and receiving treatment for cancer. There most likely will be individuals receiving treatment from a medical provider within the geographic proximity of your Club. However, often times it may mean assisting an individual from your community who has been diagnosed with cancer but needs to travel to a particular facility in another community for treatment.
- Support to families and care partners of children with cancer. Clubs should seek to identify families that need support. Some of the priority areas are emotional, financial and/or respite assistance.
- Support to healthcare providers, running the gamut from toy collection drives to fundraising campaigns to purchasing needed equipment and materials.
- Provide support for cancer research through donations to the Optimist International Foundations, where funds will be collected for distribution in a “matching grants” program for both Club projects and pediatric oncology research.

Fulfillment of these goals meets the challenges stated in the program’s motto: “Providing the Care...Finding the Cure”

3

PROGRAM STRUCTURE AND OVERVIEW

PARTICIPATION ON THE DISTRICT LEVEL:

- Appoint a CCC Chair for the District.
- Register with Optimist International.
- Establish a three-person rotating CCC committee, with one new member added each year.
- The District CCC Committee helps Clubs formulate programs within their own communities. The committee members will receive resource materials and the assistance of Optimist International staff.
- A commitment should be made by each District to support/sponsor a major cancer-related initiative, such as a cancer camp or an equipment purchase for a service provider.
- Establish a liaison to work with hospitals and/or care providers that provide children's cancer care within the District and nearby Clubs.
- Develop corporate partnerships and contacts for funding purposes.
- Report all efforts to Optimist International.

INDIVIDUAL MEMBER PARTICIPATION:

- Participate in any Club activities pertaining to childhood cancer.
- Consider making a personal gift to the Optimist International Childhood Cancer Campaign.
- Be a "mentor" to the siblings, support parents – do errands.
- Reach out and touch a child with cancer.

Above all, we want to provide a one-on-one personal touch to every child and every family stricken with this disease in a manner that only Optimists can do.

PARTICIPATION ON THE CLUB LEVEL:

- Appoint a Club CCC Chair and register the individual with Optimist International.
- Clubs should seek to identify families that need support. Identify community needs through existing caregivers and service providers.
- Dedicate a minimum of one fund raiser a year to the Club's cancer activities and an annual appeal for the Optimist International Childhood Cancer Campaign.
- Collaborate on service activities and/or fundraising efforts with a JOOI Club.
- Promote Club services through contact with healthcare providers, contact cards for families and care partners and utilization of press releases for public support.
- Seek local corporate funding.
- Clubs report efforts to Optimist International in order to help secure future funding and support for CCC from grant funders and corporate donors.

4 CHILDHOOD CANCER: THE FACTS

IN NORTH AMERICA ALONE

- Cancer is the No.1 disease killing children today. It kills more children than asthma, diabetes, cystic fibrosis and AIDS....combined.
- Cancer in childhood occurs regularly, randomly and spares no ethnic group, socioeconomic class, or geographic region.
- The incidence of cancer in children is 15-times greater than that of AIDS.
- One in every 330 U.S. citizens develops cancer before the age of 20.
- Each year in North America, more than 12,000 children and teenagers will be diagnosed with cancer.

NOW FOR THE GOOD NEWS

- Up to 75% of childhood cancer can now be cured.
- Childhood leukemia now has an 80% survival rate.
- The cancer death rate has dropped more dramatically for children than for any other age group
- More than 400,000 patient-years of life are being saved each year using newly developed treatments for children with cancer.

WE CAN RID THE WORLD
OF THIS DISEASE!

A. THE ROLE OF THE CLUB CCC CHAIR

A good starting point for Clubs is choosing the appropriate member to lead or coordinate the Clubs' Childhood Cancer Campaign. This could be an opportunity for Clubs to develop new leaders by turning over the program's responsibility to a promising member. In the best-case scenario, however, a member who has a great desire to be involved and requests the position will fill this role. To lead a cause targeted at ridding the world of a fatal disease requires passion along with pragmatism.

Now that we've identified the desired qualities, what are the duties of the CCC Chair?

- Approach or make contact with healthcare providers within the appropriate proximity of the Club to determine which of these providers — if any — are involved in providing pediatric oncology treatment or service.
- Become educated on what pediatric oncology services are available in the community; the healthcare providers' suggestions for how to incorporate the Optimist Club's members and resources into the providers' services in a complementary manner; and then relay this information back to the Club for its consideration.
- Develop a fundraising strategy in collaboration with the club's fundraising committee or the entire Club membership. Research and develop concepts for specific fund raisers and coordinate process.
- Develop service activities in collaboration with the Club membership. Coordinate the service activity/event process.
- Become familiar with, and serve as the Club liaison to networking agencies and resources within the community.
- Establish a relationship with the local media and coordinate the generation of CCC-related publicity to media outlets.
- Complete and return the Club CCC Chair form to Optimist International. This allows updates to the CCC programs to be communicated to the Club in a timely manner and makes sure that the correct person is notified. Ensure Club CCC-related service and fundraising statistics are reported to the International office.

- Register with Optimist International and ensure Club CCC-related service and fundraising statistics are reported to the international office.

B. MAKING CONNECTIONS WITH MEDICAL PROVIDERS

The area in which your Club is located, as well as what medical services are available within that area, will dictate your approach in working towards establishing a fulfilling relationship with a service provider or providers. One immediate reference tool at your disposal is the list of **Member Institutions of the Children's Oncology Group**. This list is not inclusive of all medical institutions in North America that treat children with cancer. However, it is a comprehensive list of the most prestigious medical institutions in the world of children's oncology. Clubs are encouraged to contact medical facilities in their area that are not listed to determine if they provide pediatric oncology services. You also can pursue additional provider institution information via the Children Oncology Group's web site <http://www.nccf.org>.

In the event there is no facility within the immediate proximity of the Club, other collaboration options are:

- Contact other Clubs within your District to team up with them and expand their existing CCC services.
- Get involved with a pediatric oncology center outside your Club's immediate area.
- Network/collaborate with related organizations, e.g. cancer camps, Ronald McDonald Houses, the National Leukemia Society, etc.
- Concentrate on working with families and care partners of children being treated for cancer.
- Concentrate services on educating the public on childhood cancer and raising money for research.

Making the Call. Your Club has identified an institution working with children with cancer.

Now what?

- If the institution is a medical provider and has its own pediatric center, start with the center director or its volunteer coordinator. Call and ask for an appointment to visit the center and to talk to the administration about ways the Club can collaborate or assist the center. You can also write the director in advance about the nature of your request, inserting a program brochure for his/her benefit, and then follow up on the phone to set an appointment.
- Make sure you put together some information about Optimist International and your Club to take with you and distribute to your hosts. Don't assume everyone is familiar with our organization. You can visit www.optimist.org to find an excellent source of information on the history and purpose of Optimism via the "What is Optimism" link on the left-hand side of the home page. Make sure you have prepared remarks and a plan of what you hope to accomplish from this meeting. This will help avoid wasting everyone's time.
- Be sure you are clear on what the institution's policies and procedures are and what needs they have. Do not commit to anything you know the Club would not be able to do or which would violate the Clubs policies.

In the event there is not a separate pediatric center attached to the institution, it is recommended that the Club direct its communications to one of these departments: mission services, volunteer services or social work.

For non-medical institutions, Clubs may want to direct their communications – in the following order – to the agency's Executive Director, Director of Development or Special Events, Volunteer Services or Program Services.

The great majority of institutions will welcome your offer to get involved and will be eager to work out a plan of action beneficial to both the Club and the institution.

6 CLUB CCC ACTIVITIES AND SERVICES

As stated previously, the program goals revolve around service and fund raising. While focused on different, distinct goals, these two functions share a common thread: both require **care, commitment** and **creativity** – there’s those three C’s again! You can also add in **compassion, cooperation, coordination and communication**. Let’s call it the Seven C’s to Success.

SEVEN C’S TO SUCCESS:

1. Care – In all instances, take pride in doing the job right, being mindful of the considerations of others. Be mindful of your own limitations. Remember: Care for the caregiver.
2. Commitment – See the project through with your best effort, from start to finish. Honor your agreements. There are many people depending on you, so respond accordingly.
3. Compassion – Going through the motions benefits no one. Compassion fuels desire, which fuels success.
4. Cooperation – If you throw in all the other qualities without cooperation, nothing will be achieved to its maximum benefit. There is no “I” in team and you’ll soon realize – if you don’t already – that pulling together prevents falling apart.

TRUE STORY: When some of the greatest recording artists in America assembled to produce a recording to raise awareness and support for famine-ridden Ethiopia, the first instruction coordinator Quincy Jones gave the “stars” was, “Check your egos at the door. It’s not about you.” Keep this in mind at all times: it’s about the kids.

5. Coordination – Everyone must be on the same page at the same time. Take care of the little details before they become big problems. Coordination is the sibling of cooperation.
6. Creativity – If you keep doing what you’re doing, you’ll keep getting what you’re getting. Everyone does a golf tournament, a picnic, toy collections, etc. How can you do it better? Or different? Make a splash? Challenge yourself to think outside the “box”.

7. Communications – “The last shall be first”, because this is where it all starts. Communicate amongst members to reach consensus; to the public, to tell your story; to the kids, so they feel good about themselves; to the families, so they can have hope.

In this manual you will find ideas for various service activities for Clubs targeted at supporting kids; families and care partners; and service providers. Clubs may contact CCC staff (contact information listed in the back of this manual) for additional ideas, or to submit reports of activities they’ve implemented which are not listed.

Keep in mind the list is not inclusive, and is intended to provide a sampling of activities that Optimist Clubs and other organizations involved in similar programs have found to be productive.

A list of sample fundraising projects can also be found in this manual.

7 CLUB CCC FUNDRAISING OBJECTIVES

“It takes money to make money” according to the time-tested adage. Optimists know it takes money to provide services to youth and the community. Within the scope of the CCC, Clubs are asked to consider raising funds in order to meet the following objectives:

- To purchase and implement products, services and activities for the benefit of children with cancer.
- To provide support for family members and care partners of children with cancer.
- To purchase equipment, products or services for the benefit of healthcare providers treating children with cancer.
- To advance pediatric oncology research.

In order to plan for Club CCC fundraising commitments, the Club should reach consensus first as to the types of services in which they want to involve themselves and to what extent. For example:

- Does the Club want to host or sponsor activities like a picnic or a day at an amusement park for children and their families?
- Is the Club interested in assisting a medical facility with purchasing a much-needed piece of equipment, such as a van lift or purchasing furniture for the visitor’s center, etc.?
- Is the Club interested in providing healthcare information to the community via underwriting the costs for putting on a health fair?
- Is the Club willing to assist with family-related expenses, such as travel and lodging for out-of-town treatment; covering the costs of food and utilities for a household that is cash-strapped; and/or assisting with uncovered medical expenses?
- Is the Club interested in supporting research and matching grant opportunities by raising funds for Optimist International Foundations’ Childhood Cancer Campaign Fund?

Suggestions for fundraising activities and events targeted at supporting the aforementioned requests, as well as providing related services, can be found in this manual.

8 DEALING WITH DIFFICULT ISSUES

It was mentioned earlier in this manual that close to 75% of all childhood cancer can be cured. The obvious flip side is 25% of children diagnosed with cancer will not survive. The reality is it's probable that some of the children with whom you will come in contact will die from cancer. This is just one of the potentially emotionally - charged issues your Club may encounter while engaged in CCC activities. Here are other delicate situations that may arise:

- Family members/care partners distressed over the possibility of losing a loved one.
- Family members/care partners experiencing turmoil watching a loved one suffer.
- A child diagnosed with cancer experiencing difficulty in maintaining hope.
- A sibling experiencing a wide-range of emotions from lack of attention to fear of their own mortality.
- A child dealing with the after-effects of treatment.

Before engaging in a working relationship with a medical provider and/or family or child with cancer, Optimists are advised to seek consultation and training on dealing with related sensitive issues. There are resources within almost every community to help address these concerns.

- Medical providers – Before formalizing a relationship between the Club and the institution, discuss these concerns with the provider's liaison and request specific training on sensitive issues for your members.
- Contact a local hospice and ask for a professional social worker/counselor/therapist to make a presentation or conduct training for your Club.
- Procure the pro-bono services of a professional licensed counselor or psychologist to address sensitive issues with your Club.
- Seek the assistance of family caregiver support programs in your area. Agencies such as the United Way are good sources of referrals to community-based counseling agencies.
- Utilize faith-based institutions and religious leaders to provide inspiration and spiritual reinforcement to the members.

The point to keep in mind is that these issues should not be ignored and the need for emotional support, for members as well as those you serve, is universal.

9

TELLING YOUR STORY – CLUB PUBLICITY

Publicity can mean more to your Club than “just getting your name in the paper.” By building up your Club through media coverage, you are bound to become more attractive to your community. Positive media coverage will not only enhance a Club’s image, it will also help attract new members.

Keeping press releases simple and informative is the key to getting them published. Like any industry, media members come to expect things “wrapped in certain packages.” When this isn’t done properly, some worthy news items can go unpublished. Please take a look at the following list of public relations suggestions – it may lead your Club to newfound popularity.

- This booklet contains sample press releases that are proven to attract media coverage. Try to use these releases as a guide when publicizing your event.
- Know who should receive a certain release. If your event is tailored to a certain news department (i.e. sports, local news, features, etc.), make sure you point that out on the release. This can get the process moving more rapidly.
- Make sure contact information is located on the release, so the media can contact the Club to gather further information. The contact is generally a program Chair or Club President.
- Build local media contacts. Don’t be afraid to try to build a relationship between your Club and local reporters and editors.
- Be short, sweet and succinct. No press release should ever be over two pages long. Use compact, information-filled sentences and paragraphs. Anything too lengthy may be disregarded without a serious glance.
- When submitting photos to the print media, remember that editors love action shots. A picture of Optimists standing around and smiling may be nice for a Club scrapbook, but wouldn’t likely draw the attention of a media professional. A picture should always tell part of the story. If you use a digital camera, make sure to shoot the photo in the highest resolution possible.
- Make sure to utilize a photo-release form (see sample forms in this manual) for parents to authorize the Club’s use, for publicity purposes, of any photos of their children under age 18. A sample photo release form for adults over the age of 18 granting the Clubs use of their photo is included in the manual as well.
- Emphasize the kids. Even if your Club is conducting a fund raiser where no child is present, be sure to mention the project’s ultimate goal is to help Optimists “Bring Out the Best in Kids.”
- Don’t try to follow-up your press release with a phone call. Unless new information is available, follow-ups often serve as negative reinforcement.
- Send copies of anything published to the Optimist International CCC Director, so that information can be shared with fellow Optimists.

Camp Quality USA and Canada List

The Children's Oncology Camping Association (COCA) consists of over 65 oncology camps with the United States, Canada, Australia, Europe and New Zealand. COCA serves as a trade association and resource for oncology camps. For more in on COCA, please call 1-800-737-2667 or visit them on the World Wide Web at www.coca-intl.org.

Camp Quality, an endorsed organization of Optimist International, is a member of COCA. The following is a list of Camp Quality sites in the United States and Canada. Members interested in Camp Quality can contact the national marketing office (Independence, Mo.) at 816-478-1560. Their web site is www.campqualityusa.com.

Camp Māk-A-Dream, a COCA member headquartered in Montana, serves 33 states in the U.S. plus Canada. The Māk-A-Dream Camps do admit children while they are receiving treatment. Their headquarter contact information is also listed below.

For more information on the Canadian camps, please call toll free at 1 866 738-8011 or visit their web site at www.campquality.com.

CLUB CCC ACTIVITY IDEAS

I FOR CHILDREN BEING TREATED FOR CANCER:

- Find out from parents what the child likes and recruit people to send cards and small gifts. The child may collect certain things, so add to the collection! If they don't collect anything, help the child start a collection. This will get their mind off of the pain and give them something fun to do. Puzzles, books, cassette tapes or CDs are just a few ideas.
- If the child is older and in their teens, gather some of their friends and carpool or caravan them to the hospital for a visit. Keeping in touch with friends is very important.
- Put on a fund raiser in the child's name and donate the money to the child's family to use for his/her care. It can be as easy as setting up an account at a bank so people can donate directly or throwing a special party and getting donations from local organizations so the money raised can go directly to the family.
- Sponsor an outing for children with cancer and their siblings in cooperation with the treatment facility. Potential locations are amusement parks, carnivals, parks, ballgames and the zoo.
- Create your own outing or event for kids, i.e. a picnic, Easter egg hunt, fishing trip, carnival, horseback riding, etc. You may be able to also incorporate a fund raiser into the event, such as a raffle or drawing.

Be Creative!
Be Compassionate!
Communicate!

II FOR FAMILY MEMBERS AND CARE PARTNERS:

Note – Battling cancer can take time; in fact, it can take several years. The family or care partners will need your support throughout the whole course of treatment so make it a point to spread out your much-appreciated contributions.

- Often a family is away at the hospital/work most of the time and they don't have time to keep up with housework. Mowing the lawn and picking up the family's newspapers is a way to help.
- If you are close to the family, try to get a key to the home from them and explain that you would like to clean the house. If there are other children, offer to watch them for an evening once per week or whenever you have time. If there are pets, offer to bathe them and give them fresh food and water.
- If the hospital is nearby, visit and sit with the parent. Fill them in on what's going on and what is new. Bring a favorite food and a bag filled with magazines, note cards, toiletries and anything you would want to have if you were in the hospital.
- Many times the hospital is not close. If that is the case, send pre-paid phone cards to the parent(s) so they can stay in touch with family without running up their phone bill.
- Don't forget the siblings of a child with cancer. Bring the siblings small gifts to keep them from becoming bored and/or feeling left out. If possible, take them out for a burger, movie, or free event for kids. It's important that siblings get attention to help them overcome feelings of apprehension and inadequacy.
- Providing emotional support is crucial in keeping family members mentally healthy and focused. Call on a regular basis and just listen, letting the individuals vent if needed.
- If you are the co-worker of the parent(s), talk to your supervisor about having all the people in the office donate time off to the parent, if the company will allow this.

- Make a meal for the family on a regular basis and bring it to them. You can also put together a food basket that contains the items necessary for the family to make a certain meal.
- The family needs to have fun! Give a movie gift pack that contains movie rental gift certificates, popcorn, candy and soda.
- Offer to help get other siblings to and from after-school obligations, such as practices or scouting activities.

**Be Caring!
Make the Commitment!**

III FOR MEDICAL PROVIDERS AND
TREATMENT FACILITIES:

- Establish a fund to assist with expenses for families who have traveled with a child to your community for treatment, as well as to assist with basic living expenses for local families served by the treatment facility.
- Organize and direct a fundraising drive or event to purchase a needed piece of equipment or accessory for the treatment facility.
- Sponsor a health fair for the purpose of educating the public about childhood cancer as well as the importance of umbilical cord blood donations by women after giving birth so the donations can be used in stem cell transplants.
- Sponsor a blood drive.
- Volunteer at the treatment facility.
- Conduct drives for art supplies, dolls, stuffed animals and toys.

**Be Cooperative!
Coordinate Your Efforts!**

CLUB CCC FUNDRAISING IDEAS

CATEGORY	ACTIVITY
A – Thons	Bike-a-thons or rallies, dance-a-thons, stroll-a-thons, volleyball marathons, walk-a-thons
Entertainment	Band festivals or concerts, bingo, carnivals, car shows, ethnic or cultural festivals, fairs, movie nights, mouse races, picnics
Food	Bake sales, barbecues, cake walks, cook-offs, dinner dances, fish fry, pancake breakfasts, pot-luck suppers, progressive dinners, spaghetti/chili dinners
Games of Skill	Bowling, fishing, poker, ping-pong, washers, or pool/billiards tournaments; golf tournaments (including closest-to-the-hole and hole-in-one contests), marathons or 5k runs, meat (turkey) shoots, pie-eating contests, trivia nights
Sales	Auctions, candy sales, car washes, flea markets, giving stands (set up in businesses), greeting card sales, plant sales, quilt sales, raffles, 50/50 drawings, Christmas tree lots
Travel	Antique shop tours, bus tours, casino excursions, church tours, cruises, garden tours, house tours, historic landmark tours, museum tours, paddle boat rides, train trips
Miscellaneous	Aluminum collections (cans, tabs, etc.), selling concessions at a community carnival, celebrations, fairs, etc.

Childhood Cancer Related Web Sites

***This information was provided by the Pediatric Oncology Resource Center.**

These pages are designed to help you find external links quickly.

Question: Is the information I am about to find on the Internet reliable?

Most, but not all, of the information you find on the Internet is reliable. First, look at the url.

- “.com” is a commercial site, and the sponsors of the page have a monetary investment in it. Some “.com” sites have great information; some are trying to sell you something.
- “.org” is sponsored by a non-profit organization.
- “.edu” is an educational institution; they only want to teach you something.
- “.gov” is a government site.

Next, look at who has written the page. The “editors” should list their qualifications. Medical doctors are of course good sources of information; non-medical doctors should state that fact and list their qualifications and aims in writing the pages.

Pay attention to who links into the page — if you were directed to the page by a reliable source, the new page is also likely to be reliable. Reliable pages are usually updated often, indicating that the editors are interested in keeping the information as current and accurate as possible. Always understand that the medical information you read on the Internet is not to be substituted for personal consultation with a physician.

Member-Institutions of the Children's Oncology Group

***Listed on these pages are medical institutions who treat children with cancer and are affiliated or supported by the Foundation for the Children's Oncology Group, formerly the National Childhood Cancer Foundation.

This list is not inclusive of all medical institutions that treat children with cancer. Clubs are encouraged to contact medical facilities in their area not listed below to determine if they provide services for children with cancer.***

The childhood cancer research and treatment centers of the Children's Oncology Group (COG) are located at the most prestigious medical institutions in the world. The 5,000 or more pediatric oncology specialists of COG conduct collaborative research, working efficiently and cost-effectively as they share the goals and results. Because of these cooperative methods, children with cancer are assured of state-of-the-art care, no matter where they live.

There are over 230 Children's Oncology Group member-institutions, located in almost every state and province in North America, and elsewhere in the world. Below is a listing of those pediatric oncology centers. They are listed first by state or province, then by city, COG Institution, principal investigator (the person in charge of COG protocol) and phone number.

Canada

OPTIMISTS WORK WITH YOUNG CANCER PATIENTS

Local cancer patients and their families have a friend in the Optimist Club of (club name). Optimist volunteers conducted a service project on (date) in their on-going effort to aid kids diagnosed with cancer. The project is part of Optimist International's Childhood Cancer Campaign.

(Quote from CCC Chair or Club President describing the event, for instance – “The art and craft day at the hospital is our way of reaching out and showing we care,” says John Doe, Club President. “These kids and their families are going through a lot right now. We want to show our support.”)

Optimist volunteers spent the day with the kids. (Briefly describe the program, noting specifics like how many kids and volunteers were involved, as well as the specifics of the program).

The club is a member of Optimist International, one of the world's largest civic service organizations. With 114,000 members in 3,500 clubs, Optimists are known for “Bringing Out the Best in Kids.” The organization has tabbed the Childhood Cancer Campaign (CCC) as their primary thrust in their attempt to “rid the world of childhood cancer.”

For more information about the CCC in your area or about Optimist International, please contact (CCC Chair name or Club President) of the (Club name) Optimist Club at (phone).

OPTIMIST CLUB TO HELP KIDS WITH CANCER

The Optimist Club of (Club name) will be working with kids with cancer on (date) at (location). (Name of project) is part of the club's commitment to young cancer patients in the community. Optimist volunteers plan to (briefly describe project) as part of the program. The project is part of Optimist International's Childhood Cancer Campaign.

(Use a quote from the CCC Chair or Club President to talk about the project, for instance – “We are going to help kids make crafts,” says John Doe, Childhood Cancer Chair. “We feel a donation of our time will allow children suffering from cancer help forget about what they are going through. If we can help put a smile on a few faces, I think we are doing a lot of good.”)

Activities planned during the program include (give specifics times and activities planned). (If applicable, note that photo opportunities will be available).

The club is a member of Optimist International, one of the world's largest civic service organizations. With 114,000 members in 3,500 clubs, Optimists are known for “Bringing Out the Best in Kids.” The organization has tabbed the Childhood Cancer Campaign (CCC) as their primary thrust in their attempt to “rid the world of childhood cancer.”

For more information about the CCC in your area or about Optimist International, please contact (CCC Chair name or Club President) of the (Club name) Optimist Club at (phone).
